1- The computer they prefer !

July, the 8th 2013

Page 3/14

DoudouLinux is a computer system :

- Maximizing ease of use
- Focused on children's self-fulfillment
- Complete, autonomous and secured
- Designed by parents
- Based on free software
- Developed and evolving openly
- Open to any goodwill

2- Easy learning

July, the 8th 2013

Page 4/14

- A progressive environment
- Rethought from the ground up
- From 2 years old, with discovering the mouse
- Reading is not required
- The notion of file and directory is avoided
- Can be adapted to the target audience
- Pedagogical activities created on purpose by the Tomsk university (Russia)

3- Education oriented

July, the 8th 2013

Page 5/14

- Educational suites (letters, numbers, logic, etc.)
- Music learning (piano, flute, rhythm)
- Discovering computer programming through play
- Games stimulating logic and strategy
- Already in use in schools
- Does not try to replace manuals and teachers!

4- Project objectives

July, the 8th 2013

Page 6/14

- Ease of use and robustness of gaming consoles
- Stimulate the potential of our children
- Favor autonomy and self-confidence
- Aids in mastering Technology, read [our manifesto](#)
- A safe and secure environment

“DoudouLinux reveals to children the creative, educative, cultural and fun potential that is lying dormant inside every computer.”

5- Thought for children

July, the 8th 2013

Page 7/14

The only limit must be the imagination!

- At last a computer, as easy as pie
- Children are learning while having fun
- They create drawings, comics, music, animation movies, game levels, etc.
- Designed to avoid risks, even with Internet
- To be shared, copied without moderation

6- Designed by parents

July, the 8th 2013

Page 8/14

Designed by a community of parents for parents and their children

- For the sake of **the relation with computers**
- Keep only the best
- No trial or limited version, no plugins to pay, etc.
- No ads, **not even in web pages**
- **Contents filtering**, under the full control of parents
- Blocking tracking scripts of web pages ("*bugs*")
- **DuckDuckGo** is replacing Google

<http://www.doudoulinux.org/>

7- Zero conf, zero admin

July, the 8th 2013

Page 9/14

Zero headaches : Plug in... Switch on... it works!

- Everything is already installed and pre-configured
- Most devices are automatically managed
- Connecting to a network is very easy
- No need for any “anti-” stuff, nothing to be cleaned
- Does not deteriorate with time

<http://www.doudoulinux.org/>

8- A universal system

July, the 8th 2013

Page 10/14

- Give it a try with a live CD, or a live USB key
- Easy installation (development in progress)
- ARM[™] version available (smartphone technology)
- Also runs on old equipment
- Based on **Debian Linux** (+20,000 software packages)

debian

9- An international project

July, the 8th 2013

Page 11/14

DoudouLinux is a project of international scope :

- More than 40 languages
- More than 100 contributors around the world
- Visitors coming from the 4 corners of the world
- 250,000 downloads
- Articles on the web in more than 10 languages

10- The future of the project

July, the 8th 2013

Page 12/14

DoudouLinux is still starting out and is bursting with ideas!

- Digital contents (texts, illustrations, musics, photos, ...)
- Favor sister initiatives
- Activities of cooperation between children
- Learning programming
- Put computers back into the real world
- Develop a community of children

11- Support us!

July, the 8th 2013

Page 13/14

You too, can **help us!**

- **Promoting**, installing, using
- **Translate**, write, complete documentation
- Find free digital contents
- Manual activities in PDF (folding, do-it-yourself, etc.)
- Lessons of drawing, music, etc.
- Create drawings, musics for the environment
- **Computer development**
- Donations ? Yes!
⇒ to the **Association DoudouLinux** :)
